For the same period, the performance of VNI index and S&P 500 index are 39.06% and 28.08% respectively

BeQ Global Dynamic Multi-Asset Index (DMAI) - Adaptive Benchmark for a Turbulent Global Financial Era

In a world where markets shift violently on geopolitical headlines, liquidity shocks, and macroeconomic whiplash, diversification alone is no longer enough. BeQ Holdings has introduced a new benchmark designed for this new reality: the BeQ Global Multi-Asset Index, officially known as the Dynamic Multi-Asset Index (DMAI).

It is one of BeQ's most forward-looking index families – built not as a static allocation model, but as an intelligent, adaptive system that responds to real-time market conditions and global sentiment.

A New Breed of Adaptive Multi-Asset Benchmarks

Unlike traditional multi-asset indexes that rely on fixed allocations or rigid balancing rules, the BeQ DMAI is explicitly engineered to be dynamic.

It continuously adjusts exposures across both risky and non-risky asset classes, responding to:

- market volatility
- macroeconomic signals
- investor sentiment
- shifting cross-asset correlations

This design is clearly stated in the index's introduction: DMAI is “adaptive, risk-aware, and diversified across both risky and non-risky assets”.

It is, in essence, an index that thinks – and reacts – like a modern global investor.

Responding to Real-World Market Conditions

Financial markets in 2025–2026 have been defined by rapid shifts: inflation cycles, geopolitical tension, USD strength, commodity swings, and equity rotations. Static models fail in such environments, but the DMAI methodology was built for this complexity.

The index algorithm incorporates:

- cross-asset risk metrics
- macroeconomic trend indicators
- correlation-breakdown detection
- sentiment & volatility signals

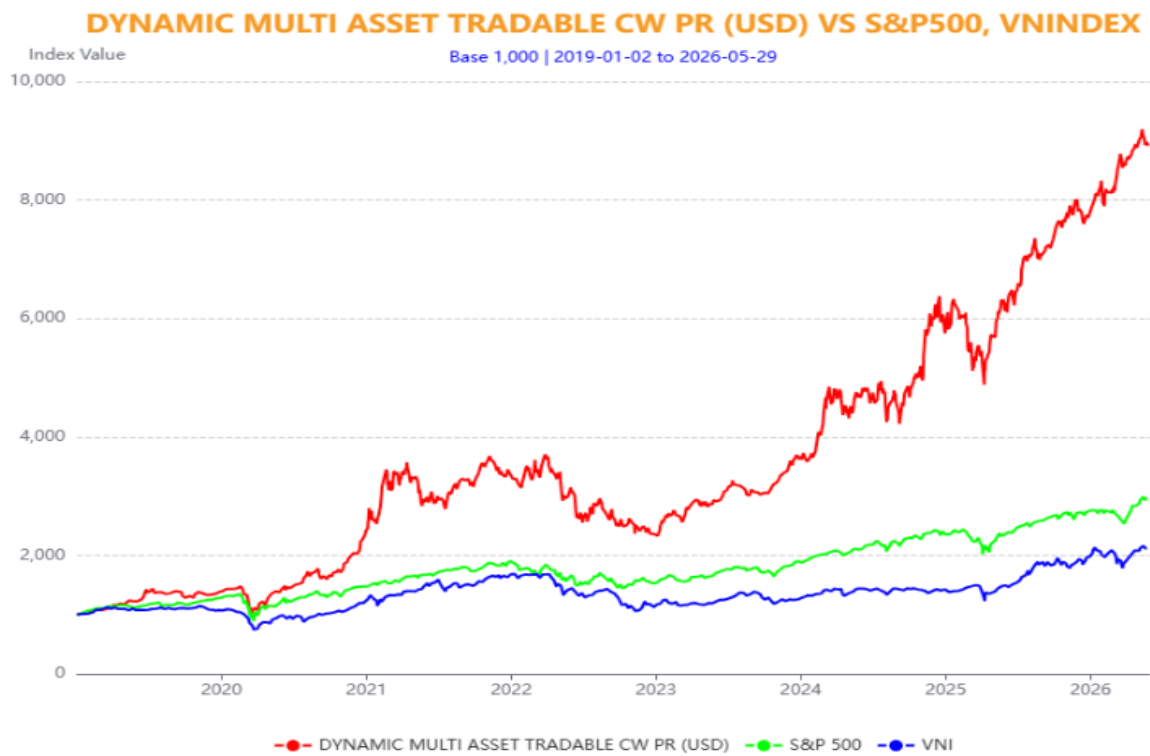

These features position DMAI as one of the few multi-asset benchmarks specifically designed to function in periods of extreme market instability.

Composition

Top 5 Constituents of BeQ Global Dynamic Multi-Asset Indexes

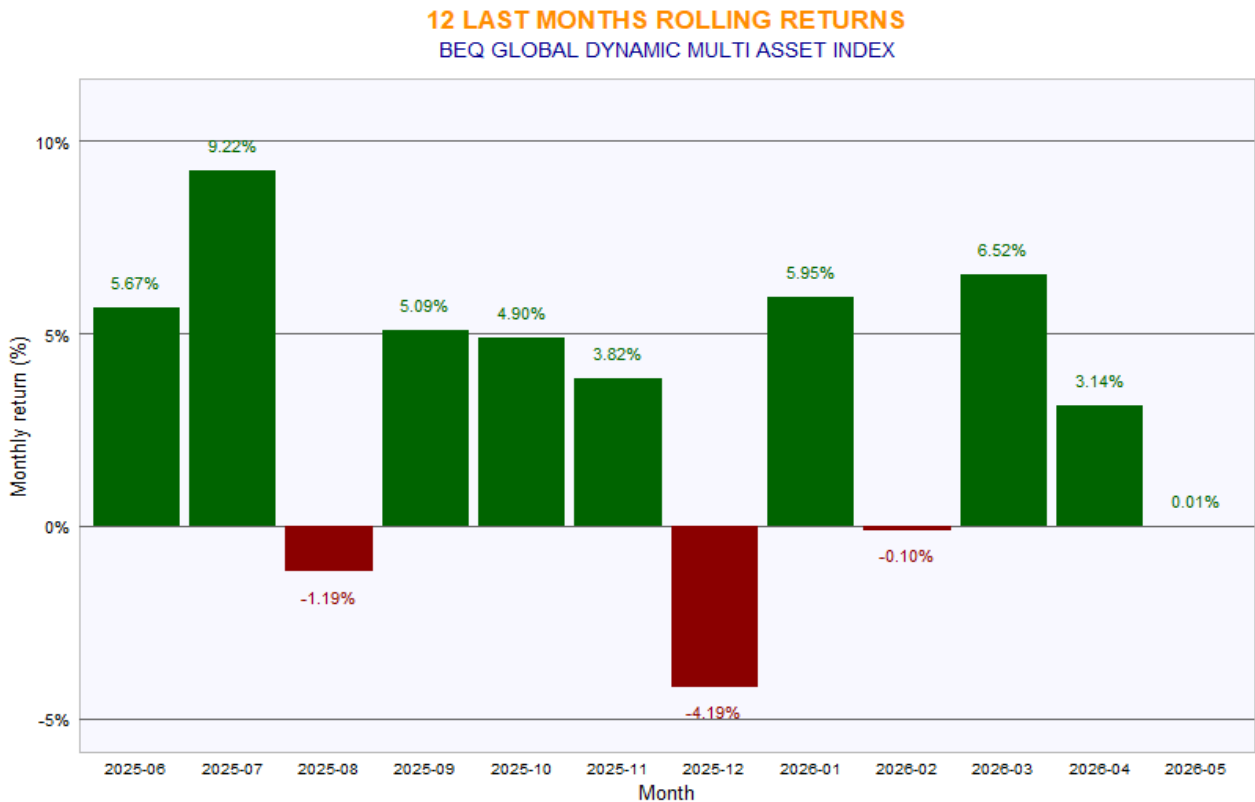

Nr	Name	Ticker	Sector	Weight
1	[REDACTED]	[REDACTED]	AI ETF	30%
2	[REDACTED]	[REDACTED]	COMMODITY ETF	15%
